

The figure is a scatter plot with two main clusters of data points. The x-axis is labeled with values -10, 0, 10, 20, 30, and 40. The y-axis has no numerical labels. The first cluster is located on the left side of the plot, centered around x = -15. The second cluster is located on the right side of the plot, centered around x = 42. Both clusters consist of many small black circles, with a few grey circles at the bottom of each cluster.
